DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- prod.*
proc. of making
proc. of using
- I. Claims 1-19, drawn to a composition for disruption of a membrane, classified in class 435, subclass 7.2.
 - II. Claims 20-26, drawn to a method of making of a polymer for disruption of a membrane, classified in class 435, subclass 7.2.
 - III. Claims 27-32, drawn to a method of use of a polymer to disrupt a cell or organelle, classified in class 436, subclass 63.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group II and III are related as process of making and process of using the product of group I. The use as claimed cannot be practiced with a materially different product.

Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP §

806.05(i)).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1641

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
